

Microsoft E-Learning for CPLS partners

Microsoft E-Learning courses, collections and bundles now more easily available for Microsoft Certified Partners for Learning Solutions.

With inexpensive vouchers, simple procedures and complete certificate bundles, every CPLS can offer its clients good E-Learning solutions.

E-learning producttypes:

- > eCourse
1 till 6 hour training
- > eCollection
bundle of courses
6 till 40 hour training
- > eLibrary
certification bundles
MCSE, MCTS, Vista etc

E-learning audiences:

- > IT Professionals
- > Software Developers
- > Information Workers

Now available:

- > 200 eCollections
- > 1200 eCourses
- > more than 4000 hour of E-learning online

Less and more...

E-Learning courses

All E-Learning courses are part of the OMLP curriculum (Official Microsoft Learning Product). This is the world-wide standard for Microsoft-certified trainings, certifications and exams. The total collection of E-Learning products contains 200 collections of more than 1200 courses, divided over three function categories:

- IT Professional
- Software Developer
- Information Worker.

The courses are available in various languages and stand out for their use of multimedia and interactivity. A real addition to the learning efficiency are the "Virtual Labs". These labs enable the user to put their knowledge and skills into practice in a real-time environment.

Various certification bundles are now also available. These bundles contain all the required E-Learning for several Microsoft certifications (f.i. MCSE2003 or MCTS.Net 2.0) at a very competitive price.

Microsoft E-learning reseller partner in EMEA

Until recently Microsoft E-Learning was only available through Bertelsmann E-Learning vouchers and by directly ordering from the website microsoft-elearning.com.

In order to facilitate the growing demand for E-Learning, Microsoft has decided to appoint international resellers. As of 1 August 2007 Twice is now one of the resellers in EMEA in cooperation with Bitmedia in Austria. CPLS can now offer Microsoft's complete E-Learning collection to their clients through Twice.

E-learning platform

All courses are offered on a web-based E-Learning platform so that students can follow their desired course in a simple and structured way. A link with Microsoft ensures that the course content is always up-to-date and that quality is guaranteed.

For access to the platform only a voucher is required. This voucher can be purchased in the protected and closed CPLS portal.

E-learning for CPLS:

- > simple procedures
- > excellent service
- > quality content
- > no investments
- > interesting margin

How does it work?

Registration CPLS

Further information can be found on the CPLS E-Learning website: <http://www.cplselearning.eu>. You can also apply here. On the "prices" page there is an overview of the purchase and recommended retail prices for the various courses. To request a log-in code, please send an email with your CPLS details and Microsoft Partner ID to: info@cplselearning.eu.

To buy E-Learning vouchers and offer them to your clients, apply on the page: "Apply CPLS". The application procedure begins. Once the application is received, the Microsoft Partner ID is verified and the contract is signed, a personal log-in code will be sent for the CPLS voucher portal. All vouchers are anonymous, registration of student details is not necessary.

Purchase vouchers by CPLS

One or more vouchers can be purchased in a secure environment on the CPLS voucher portal. The vouchers are anonymous. It is not necessary to register students or enter customer details. The vouchers are sent by e-mail to the CPLS. They are valid for each collection or bundle but can, if necessary, be linked to a specific course by the CPLS. The vouchers are valid for a period of 12 months and students must activate them within 6 months.

Activation of vouchers

The student can log in on the E-Learning platform and use the voucher to select a collection or bundle. After activating the voucher the student can follow the relevant courses for a period of one year and make use of all facilities in the special E-Learning environment.
